The Director of Central Intelligence

Washington, D.C. 20505

Critical Intelligence Problems Committee

10 September 1986  
DDW-183

WEEKLY ACTIVITIES & STATUS REPORT FOR THE DD/ICS--10 September 1986

CIPC Organizational Activities

- Jim returned to duty on 8 September after a five day bout with the flu.
- 25X1 ● [ ] OT&E, began a four-month tour on 8 September.
- 25X1 ● I talked to D/FBIS on 8 September regarding [ ] release date. He reported that because of FBIS' workload she will not be released for another four to five weeks.
- Rich attended this week's IR&DC working group meeting instead of Paul. Rich will serve as our representative on the working group, which is preparing a report for the DCI on advanced technologies that could have intelligence applications in low-intensity conflicts. We will work out a cooperative arrangement with ES/IR&DC on sharing the results of these proceedings within the ICS.
- Willi reviewed a Defense Communications Agency study addressing deficiencies in C<sup>3</sup>I capabilities to support U.S. operating forces. The study leaves a lot to be desired, so the review has not been very gratifying (basically, the report says everything is wrong, everywhere, without offering much specificity).

WEEKLY ACTIVITIES & STATUS REPORT FOR THE DD/ICS--10 September 1986

25X1 NFIP Support for Contingency Operations

- On 5 September a draft study without conclusions, recommendations and annexes was hand-carried to members of the working group for review and comment. A working group meeting to discuss the draft has been scheduled for 12 September 1986.

25X1 Intelligence Support to SDI

- 25X1
- Rich continued to draft the strawman version of our SDI study in  stead and the plan is to have a draft CIPC report ready by the end of October for consideration at a November CIPC meeting. The only new development was the arrival on 5 September of our information copy of the revised PPS report on SDI. The D/ICS covering memorandum requesting comments by 22 September states that the report will be sent to the DCI and to the CIPC for use in our study. The existence of a separate PPS report partially overlapping our TOR will complicate and could delay the production of the CIPC study.

25X1 Force Multiplier Working Group -

- Tony circulated the minutes of the 26 August meeting of the Force Multiplier Working Group with its agreed timetable for study contributions.
